## Upcoming events

May	
Friday 24 <sup>th</sup>	Grade 5-6 Sport vs OLOM at Hagley
June	
<b>Sunday 2<sup>nd</sup></b>	<b>Vege Garden Working Bee</b>
Thursday 6 <sup>th</sup>	Nthn Midlands Cross Country
Friday 7 <sup>th</sup>	Statewide Moderation Day – no school for students
Monday 10 <sup>th</sup>	Long Weekend – NO SCHOOL
Tuesday 18 <sup>th</sup>	All Schools Cross Country

## Assembly Roster

### Week 4

**Wednesday 22<sup>nd</sup> May**

**Whole School Assembly at 11.30am hosted by 3/4 Cini & Prep Walker/Eyles will be sharing.**

### Week 5

**Whole School Assembly on Thursday 30<sup>th</sup> at 11.15am.**

## Canteen Call Out!!

**We need your help. Our Canteen needs more volunteers, especially whilst some of our regular volunteers are away. Please contact the office if you are available to help.**

## From the Principal

Hello everyone,

Today we held our school Cross Country Carnival. Primary students braved the frost and ran during the coldest part of the day, and our early childhood classes participated after recess, when temperatures started to warm up and conditions were a bit more friendly for our young participants.

It was wonderful to welcome families to school to cheer their children on during their races. We saw many students show courage and persistence, resilience during tough moments, and great sportsmanship. I am always encouraged by the strong participation of our students – with such positive attitudes, whether they are strong runners, slow runners, or young people who really do not enjoy running. The positivity, the resilience, and the strength shown by our runners is to be congratulated and celebrated.

Of course, we congratulate the students who excelled, and completed the race in the top few places, making their place in the Northern Midlands Cross Country Team, but I also congratulate the students who strived to run the race and who pushed hard despite the challenges of running such long distances.

During the weekend the Newstead Athletics Cross Country event was held at Hagley Farm School. There were many participants, but it was great to see the number of Hagley students participating. Well done to Lachie and Evie who ran fantastic races, coming in first in the grade 6 event. Thanks to Lee for his preparation of the track, to Mr Lynch for focussing on training for the event, and to Mr Ankin for ensuring the event took place at Hagley.

Did you know that our Breakfast program has started on Monday mornings? Mrs Beams has a group of grade 6 students who are preparing toast, muffins, and hot chocolate for students as they arrive at school. It is all free, and we really encourage everyone to drop into the canteen, even if they already have eaten something for breakfast. I love popping to grab a slice of toast with vegemite to start my Monday as I head out to bus duty. It is a great start to the day.

Cold weather has arrived. Please ensure that your child is coming to school with jumpers/jackets/HFS beanies etc. Puffer jackets and non-school beanies are not a part of our uniform and they are not able to be worn at school. School jackets, thermals, layers are all appropriate for students to be warm. It is pleasing to see some students wearing a navy coat as a layer as well. Please support your child to come to school in appropriate warm school uniform items during the next few months.

*Jeanagh*

### **5/6 SPORT**

The 5/6 sport roster continues this week! We are playing at home this week against OLOM. Keep an eye on our Facebook page for further details.

Family and friends are more than welcome to come and watch.

Requirements for each sport are listed below:

**Netball** – A full uniform is supplied. Students will need sneakers and to have removed their jewellery and have cut their nails short prior to the games.

**Football** – A football guernsey is supplied. Students will need football boots, shorts and a mouth guard.

**Soccer** – A playing top will be supplied. Students will need sneakers or soccer boots, sports shorts and shin guards.

**Hockey** – A playing top will be supplied. Students will need sports shorts, sneakers, shin guards and a mouth guard.

**\*Mouth guards are compulsory for Hockey and Football – No mouthguard = no play.**

**We ask that students have a packed lunch on Fridays for term 2 and 3 and do not order pies and sausage rolls on 5/6 sport days.**

**Cameron Lynch**  
**P.E Teacher**

## SPECIAL ASSEMBLY

In tomorrow's assembly our school will participate in National Simultaneous Storytime. The assembly will be hosted by 3/4 Cini and Prep Walker/Eyles will be sharing a piece of work. At 12:00, as a school, we will listen to the story 'Bowerbird Blues' by Aura Parker.

Last year, over 2 million people Australia-wide participated in this event. We are very excited to be part of such a large group of people doing the same thing at the same time. "When we read together it helps language development, learning and literacy, all while building community. It's also a lot of fun."

**Nicole Eyles – AST**

## SCHOOL ASSOCIATION NEWS

The School Association are working with the school to enhance the learning opportunities and productivity of the school vegetable garden. We are hosting a working bee on the 2nd June. All experience and age groups welcome. Please let the school office or Jane 0439 877 573 if you can attend so we can cater for a sausage sizzle on site.

# HAGLEY FARM SCHOOL

## VEGE GARDEN

### Working Bee

**SUNDAY 2ND JUNE 10.30 - 1.30**

**Please come along and join us in  
preparing the garden for learning**

Weeding, pruning, mulching  
Enjoy a sausage sizzle on location

**All ages and levels of experience are welcome**

*Any queries please contact Jane - 0439 877 573*

## News from the Library

### National Simultaneous Storytime

This week we celebrate National Simultaneous Storytime, with an amazing book by Aura Parker – Bowerbird Blues. Children will have a chance to share this story and learn about Satin Bowerbirds during their library lesson or at our whole school assembly this Wednesday.

A very big thank you to Mrs Eyles and Mrs Clark for leading the celebrations.

If your family would like to share the story at home, you can access the following video – available until this Friday: [NSS2024 Auslan over original HD on Vimeo](#)

For more information about Bowerbirds, visit Bird Life Australia - [Satin Bowerbird - BirdLife Australia](#)

### Volunteers' Week

It is Volunteers' Week and we would love to take this opportunity to thank our volunteers – the parents who come in to support Reading Club before school on Tuesdays, Wednesdays and Thursdays, our clever book covering volunteers, and the students who volunteer their time as Reading Club Buddies and as library helpers during lunchtimes. We really appreciate all that you do to support reading, access to books, and a love of stories and information.

*Student and parent volunteers are essential to Reading Club.*

### Book Club

Orders for issue 3 have been submitted however late orders will be accepted until tomorrow evening (9pm, Wednesday 22<sup>nd</sup>).

*Happy National Simultaneous Storytime Week from The Library Team – Mrs Jessica Marston (Teacher-Librarian, Monday, Tuesday, Wednesday) and Mrs Bron Walker (Library Technician, Tuesday, Thursday)*

# IN 5/6 STYLES WE HAVE LEARNT...

...that sugar, yeast and warm water makes dry yeast wake up and start budding. - Oscar

...how to do a decimal number line in maths; you break the line into parts from 0 to 1 and then into more parts from 0.1 to 0.2. - Ash

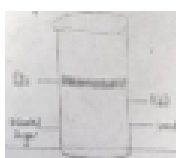

...that some people think that 0.142 is bigger than 0.3 because 142 is bigger than 3, however this is incorrect. 0.3 has 3 tenths, 0.142 has 1 tenth, so 0.3 is bigger. - Matilda

...that yeast is a fungus and is part of the mould and mushroom group. Sugar is a food that give people energy which is the same for yeast. It gives yeast energy, so it reproduces and starts budding. When it buds it gets rid of carbon dioxide. - Alexis

...that decimals are numbers that have value and if I compare 0.33 and 0.3, I know that 0.33 is bigger. I can show this on a number line. - Georgie

...that when yeast and sugar combine it has a reaction and makes a gas called  $\text{CO}_2$ . - Evie

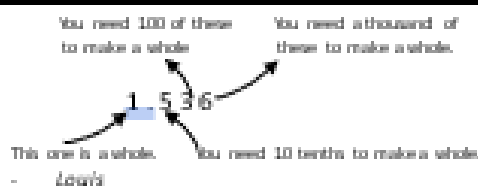

...to trust people with my safety during team building. - Lewis

...that seahorses are very strange creatures. I have learnt that the males give birth and that they have a swim bladder which allows them to move up and down by releasing and sucking in blood. I have that quite a lot of seahorses are teeny tiny and they can change their colour. - Ezra

...that a zentangle is a pattern used for a background in a shape to make it pop. They are usually in black and white, but also can be found in colour. - Isabelle

...that yeast will bubble up. This happened because the warm water hydrated the yeast and the sugar helps it make a gas, giving it energy. - Noah

...that decimal numbers are the numbers between two whole numbers that are a part. A decimal number is a number like 2.35 or 0.783. The way to tell which one is bigger is based on the decimal point. Out of 0.34 and 0.252 the first one is bigger because 3 tenths is bigger than 2 tenths. Between 0.30 and 0.37 the second one is bigger because 7 hundredths is bigger than 0 hundredths. - Griff

...yeast combined with warm water and sugar gives yeast energy causing it to create bubbles and release carbon dioxide as well as alcohol. - Jude

...when you add sugar and water to yeast it will start to get bigger and carbon dioxide will start coming out. - Harley

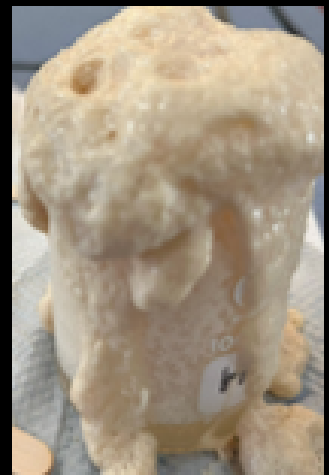

...things about a platypus. When they dive down for food they close their nostrils and eyes. Their nose senses their food. Then they float back to the top of the water. The males have a spur which is poisonous. - Lincoln

...during team time communicating with the people in the class, we gain confidence, we trust our classmates to hold the sticks while we walk across them. - Lily

...about factors and multiples in maths. A factor is a group of different numbers that make another number. For example, say you have the number 10. If you split it into its factors, they would be 5, 2, 1 and 10. I know this because if you take a factor and multiply with another factor and it equals the number you have chosen then it is a factor of that number e.g.  $5 \times 2 = 10$ . - William

...that team building is where you go outside with 6 sticks. Two people hold one stick on each end while one person walks across the top. The reason why we do team building is so we can communicate and trust each other. - Jemie

...that sugar gives yeast energy and 'wakes' it up. The yeast starts to bud and makes carbon dioxide and ethanol, which is an alcohol. - Stella
